

Sole Source Procurement Declaration
Fredericksburg City Code § 2-361(d)

What is being procured: Traffic Cabinets

Selected vendor: RGA, LLC

Contract amount: \$24,000.00

Why this is only practicably available from one source:

The NEMA TS-2 traffic signal cabinets have been purchased from three different manufacturers/vendors for the purpose of comparing the functionality and configuration of each, to determine which model best suits the City's application. It has been determined that the NEMA TS-2 cabinets offered by RGA LLC offer benefits not yielded by cabinets provided by any of the other cabinet manufactures/vendors.

The RGA LLC NEMA TS-2 cabinets are the only cabinets that have been found that do not contain a 24 volt relay control circuit that has been a critical point of failure in the City's existing cabinets.

When the City of Fredericksburg draws up plans for new signals to be built, this particular traffic control cabinet is specified in the plans.

The City has continued to review new cabinet offerings from other vendors as they become available and determined that the cabinet quoted by RGA, LLC still continues to best fit our operational needs, while maintaining competitive pricing.
