Mayfield Community Update - January 2022

Supporting Mayfield Community

CSX was pleased to make a contribution recently to the Mayfield Civic Association through our Community Service Grants program to support their plans to develop a parking lot next to the community center. The new parking lot will create reserved parking spaces for program participants to avoid limited on street parking used by residents.

We appreciate the Mayfield Civic Association leadership and the City for working with us on this opportunity and we look forward to identifying other initiatives to support in the Mayfield community.

Propane Volume Update

With recent colder temperatures, propane car volumes increased in January over December to support heating needs of homes and businesses as anticipated. February's car orders and volumes will be similar to January. Reflecting warming trends in regional forecasts, car orders are expected to decline by 35% or more from February to March. March and April volumes are projected to be similar to last year.

As noted in previous messages, these are estimates subject to change and offered in an effort to be as transparent as possible. Regardless of number of cars, CSX wants to remind everyone that cars move everyday as part of efficient and safe local service and cars are not stored in the yard.
